On October 20-21, 2015, Region 6 met in Addison, TX for the EPA End-of-Year meeting. In conjunction with this meeting a Pre-SFIREG meeting was held from 8:00 to 9:00 a.m. on October 21st. Arkansas, Texas, Louisiana, Oklahoma, and New Mexico were represented at this meeting. Below are the topics of concern that Region 6 requested be presented at the December 7-8, 2015 SFIREG meeting:

Credentials
- Still have issues with the website
- Website will show the course has been completed but will not produce a certificate
- Asked to produce old certificates, some 10+ years old, or redo the course
- Still get incorrect information on what courses are to be completed
- Is it possible for regional inspector training to count towards credential requirements

Pollinator Update
- Most states have some kind of draft plan and/or outreach encouraging communication between grower, applicator, and beekeeper.
