

State	Lead Agency	Contact Person & Information	Email	Plan Status	Stakeholder Engagement Process	Apiary Registry	Mapping Service	Target Groups for BMPs	Types of BMPs	Evaluation Measures
AL	Alabama Farmers Federation	Mac Higginbotham (334) 612-5610	mhigginbotham@alfafarmers.org	Additional Comments: In development; using Mississippi plan as template						
AK	Alaska Department of Environmental Conservation	Bob Blankenburg (907) 269-7690	bob.blankenburg@alaska.gov	No plan will be developed Additional Comments: ADEC has been following issue; limited use of insecticides; crops don't need managed pollinators.	No stakeholder meetings held or planned for the future	No apiary program but bee keeper organizations do exist	N/A	N/A	N/A	N/A
AZ	Arizona Department of Agriculture	Jack Peterson (602) 542-3575	jpeterson@azda.gov	Completed and developing/amending additional plans Additional Comments: Plan is written and posted on our website.	2 public meetings in 2015, pollinator advisory committee will be appointed in June by Director Killian	No	No	No	General suggestions to help people consider	Still being developed.
AR	University of Arkansas	Gus Lorenz (501) 676-3124	glorenz@uaex.edu	Additional Comments: Developed as a voluntary set of management practices.						
CA	California Department of Pesticide Regulation; Almond Board of California	George Farnsworth (916) 445-4163 Gabrielle Ludwig (209)765-0578 Courtney Albrecht dveenstra@almondboard.com	George.Farnsworth@cdpr.ca.gov gludwig@almondboard.com courtney.albrecht@cdfa.ca.gov	Additional Comments: Pollinator protection plan in draft form. A statement about the final plan will be finalized within the next two weeks. A DPR website is currently in its final stages of development. With the exception of an agreed upon mechanism to measure effectiveness, laws and regulation currently in place meet or exceed six of the seven critical elements of a State MP3.	DPR-2014: 13 outreach events; 2 training events. 2015: 13 outreach/meeting events; 6 training events. CDFA: Healthy Pollinators Working Group	Registration and identification of apiaries required per Cali Food and Agriculture Code (FAC) section 29040-29056				
CO	Colorado Department of Agriculture	John Scott (303) 869-9056	johnw.scott@state.co.us	Completed and developing/amending additional plans Additional Comments: At this point the CDA is still waiting to see EPA's final Pollinator Protection guidance document. The CDA has also reached out to other stakeholders to identify potential partners in the state as it moves forward to expand Colorado's current Colorado Pollinator Workgroup and current MP3. Pollinator protection plan developed and published.	Yes - public meetings in 2011, 2012 & 2013 In September they met with beekeepers in the state to get feedback on their wants and needs, and discussed the possibility of reinvigorating the Colorado Apiary Act. The CDA will be planning future meetings and discussions once it sees EPA's finalized guideline.	No formal requirement in CO Apiary law	Driftwatch / BeeCheck-Growers, Beekeepers, Applicators https://co.driftwatch.org/	Pesticide Applicators, Beekeepers, Land Managers/Growers	Education, Communication, Cooperation, timing of applications, identification of pesticides with low toxicity, proper applications, covering/moving bees when possible, pollinator health checks	No funding or resources available at this time to develop and track evaluation measures

DE	Delaware Department of Agriculture	Faith Kuehn (302) 698-4587 Chris Wade (302)-698-4570	Faith.Kuehn@state.de.us Chris.Wade@state.de.us	In draft form Additional Comments: Pollinator protection first draft published. All comments received, now making appropriate changes to reflect some of the comments received from stakeholders.	Draft was open for public comment until March 2016 Many stakeholder meetings conducted. Some large meetings and also some smaller association meetings conducted.	Mandatory hive registration with state apiarist/Plant Industry Section	Driftwatch/ BeeCheck	Pesticide Users, Beekeepers, Growers, Landowners, Urban Pest Control, Mosquito Control	Communication, Label precautions, Site registry, Forage info	Number of bee incidents reported, increased forage acres, bee mortality rates, number of hives listed on DriftWatch. Surveys have been done, meeting attendance tracked
DC	Department of Energy & Environment Hazardous Material Branch	Natasha Garcia Andersen	natasha.garcia-anderson@dc.gov	In progress Additional Comments:	Stakeholder meeting planned for the fall of 2016	Mandatory registration; mapping system in progress	None Currently	Applicators and beekeepers	TBD	TBD
FL	Florida Department of Agriculture and Consumer Services	Steven Dwinell (850) 617-7913 Jeanette Klopchin	steven.dwinell@freshfromflorida.com jeanette.klopchin@freshfromflorida.com	Completed and developing/amending additional plans Additional Comments: Pollinator protection plan developed and published - Plan amendments include cucurbits, blueberries, ornamentals, mosquito control, bee removal, and partnerships for pollinator forage.	Yes - three public meetings in 2013, 2 in 2015 - beekeeper and separate grower steering committees developed. Stakeholder meetings every 6mo (Feb/July).	Mandatory Beekeeper Registration and inspection, permitting in/out of state travel	Voluntary GIS-based mapping system	beekeepers, growers, pesticide users, regulators, extension (train-the-trainer)	communication, timing, pesticide use/selection, forage paired with ag, sample contracts, more TBD	baseline survey Jan 2016, to be amended and repeated yearly.
GA	Georgia Department of Agriculture	Mike Evans (404) 586-1140	Mike.Evans@agr.georgia.gov	Complete Additional Comments:	2 public meetings in 2015. Draft plan was provided to Georgia Farm Bureau and commodity groups prior to the public meeting.	Hive registration is not required in GA. Hive registration is not required in GA. Voluntary apiary yard registration is currently not	N/A	Beekeepers (Commercial & Hobby), landowners, pesticide applicators, & growers	communication recommendations, bee health recommendations	
HI	Hawaii Department of Agriculture	Thomas Matsuda (808) 973-9404	thomas.k.matsuda@hawaii.gov	To be developed but not yet started Additional Comments: Finalizing survey questions to various stakeholder groups that have been identified. 1. Bee keepers 2. Landscape/Nursery Industry 3. State and Govt. applicators 4. Schools. Survey results will help shape Hawaii's MP3..	Have made e-mail contacts with certain individuals but buy in with participation is slow at this time. Identifying key contacts who will assist with providing names of individuals/groups to be surveyed.	Hawaii has a voluntary bee registry with the majority of beekeepers on the Big Island. This voluntary registry is maintained by the Hawaii State Apiary Program.		Commercial and hobby beekeepers, ag and pest control applicators, applicators in state and county departments and applicators in the landscape/nursery and golf course and schools.	TBD	Will conduct follow up surveys to measure success of MP3 in Hawaii
ID	Idaho Department of Agriculture	George Robinson (208) 332-8531	george.robinson@agri.idaho.gov	In progress Additional Comments: plan under development.	The document will be distributed to beekeepers and application companies. Stakeholder meetings will be conducted after comments and suggestions	Apiary registration mandatory	N/A

IL	Illinois Department of Agriculture	Warren Goetsch (217) 785-2427	warren.goetsch@illinois.gov	Additional Comments: No new updates since the summer. We are hoping to hold stakeholder meetings over the winter.		Adopting voluntary apiary registration through DriftWatch				

State	Lead Agency	Contact Person & Information	Email	Plan Status	Stakeholder Engagement Process	Apiary Registry	Mapping Service	Target Groups for BMPs	Types of BMPs	Evaluation Measures
IN	Office of Indiana State Chemist, Purdue University	Dave Scott (765) 494-1593	scottde@purdue.edu	In final review Additional Comments :In process. 6th draft. Working on which measures to utilize.	1. beekeepers, IN Pesticide Review Board (IPRB), CES, ag retailers, conservationists, lawn & landscape professionals, pest management professionals, IN Farm Bureau, IN Dept. of Natural Resources, IN Dept. of Environmental Mgmt. , IN Dept. of Ag, 2. All hands kick off mtg. and quarterly IPRB mtgs since 3-30-15	No.	DriftWatch (Bee Check) used by commercial and hobbyist beekeepers and applicators of all types.	ag applicators, lawn & ornamental applicators, specialty crop growers, homeowners	see attached	Not yet determined. See attached proposal.
IA	Iowa Department of Agriculture & Land Stewardship	Gretchen Paluch (515) 281-8590	Gretchen.paluch@iowaagriculture.gov	Additional Comments:State "bee rule" serves as Iowa's most significant pollinator protection action. It can be found under Iowa Administrative Code (ch. 45.31). IDALS is in the process of completing the formal drafting of its Plan which will document the Department's historical and ongoing interactions with the State's MP industry.	The target stakeholder groups include MP owners/keepers, licensed pesticide dealers, licensed commercial pesticide applicators, ag retailer industry associations, ag producer associations and individual ag prodcers. The Department will begin the process of	Iowa utilizes an online sSensitive Crops Registry that incorporates rthe registry of MP sites in the state. In the coming year, this system will be replaced with Iowa's participation in the DriftWatch system	See, previous response	MP owners/keepers, licensed pesticide dealers, licensed commercial pesticide applicators, ag retailer industry associations, ag producer associations and individual ag	In development	In development
KS	Kansas Department of Agriculture	Gary Meyer (785) 564-6692	gary.meyer@kda.ks.gov	Additional Comments:		Adopting voluntary apiary registration through DriftWatch.				
KY	Kentucky Department of Agriculture	John Pitcock, (502) 782-9211 Tammy Horn	john.pitcock@ky.gov tammy.horn@ky.gov	In final review Additional Comments: Pollinator Protection Plan is available on KY Dept. of AGR website. Taking public comments on it. Hope to implement in 2017	1st Public Forum, Feb. 24 2016; 2nd Public Forum, July 13, 2016; Pesticide directions on website;	Voluntary Registration with State Apiarist	KY Dept. of AGR is using KY Transportation Cabinet GIS data	KY State Beekeepers Association, Landowners, habitat planners, chemical applicators	tree inventories, monarch garden stats, hive counts, outreach, distribute info	State Apiarist report due at the end of the year, indicating hive counts, losses, outreach efforts, tree counts
LA	Louisiana Department of Agriculture and Forestry	Allen Fabre (225) 952-8100	allen_f@ldaf.state.la.us	No plan will be developed Additional Comments: Not working on a formal plan. We are working with LSU on a brochure to facilitate communication with beekeepers. These brochures will be sent out soon. The Louisiana Pollinator Cooperative Conservation Program (LPCCP), established in May 2014 to foster cooperation among bee keepers, pesticide applicators and agricultural producers for the purpose of preventing honey bees and pollinators from the unreasonable exposure to pesticides through education and stewardship	Working with LSU on the Louisiana Pollinator Cooperative Conservation Program; meetings/email	Mandatory in Louisiana				
ME	Maine Board of Pesticides Control	Henry Jennings (207) 287-2731	Henry.Jennings@maine.gov	Complete Additional Comments: Maine has published and distributed a final draft for its Pollinator Protection Plan, developed by the Department of Agriculture, Conservation and Forestry (DA CF). The plan has been in place for about 1 year. The plan will be amended as necessary.The Board suggested that the Maine Department of Agriculture, Conservation and Forestry take the lead role in developing a pollinator protection plan, and the Department has accepted that	The Board of Pesticide Control cosponsored a "Pollinator Health And Safety Conference" 11/20/14. 250 people attended including beekeepers, growers, regulators, educators and policy makers.	Existing apiary regulations require anyone keeping honeybees in Maine to obtain an apiary license. This information is tracked by the Maine State Apiarist. Further information on apiary licensing can be found at		Pesticide users, landowners/growers/agencies, beekcepers	*Relationship bulding among beekeepers, landowners, pesticide applicators, and agencies *Promoting clear communication *Notification *Planting or improving bee	Website analytics are available. DAF staff includes references to the Plan in all pertinent public presentations.

MD	Maryland Department of Agriculture	Ashley Jones (410) 841-2767 Dennis Howard	ashley.jones4@maryland.gov dennis.howard@maryland.gov	Additional Comments: MDA has held internal meeting with apiary inspection unit in Department	Stakeholder meeting held January 20, 2016, BIP reps present with 90 attendees	N/A				
MA	Massachusetts	Taryn LaScola (617) 626-1776 Kim Skrym (857) 319-1020	taryn.lascola@state.ma.us kim.skrym@state.ma	In draft form Additional Comments: Draft completed. Listensing session about the draft were held and comments are being complied.	The Massachusetts Farm Bureau took initiative to convene a group of stakeholders to discuss a pollinator protection plan Stakeholders included bee keepers, farmers, pest	Registration is voluntary per state law/regulations	N/A	TBD	TBD	TBD
MI	Michigan Department of Agriculture & Rural Development	Michael Hansen (269) 429-0669 Jeff Zimmer	hansenmg@michigan.gov	Additional Comments: Have developed IPM plan for pollinators in apples; will be developing plans but waiting on EPA plan requirements; Michigan State University developed an extension bulletin titled Minimizing Pesticide Risk to Bees in Fruit Crops. The Michigan Department of Agriculture and Rural Development assisted with development. These efforts will support MP3	The first shareholder meeting has been scheduled for February 22nd.	MDARD uses Driftwatch as the mechanism to register apiary locations and provide beekeeper information				
MN	Minnesota	Joe Zachman/left state service (651) 201-6588	joseph.zachman@state.mn.us	Additional Comments: Have a proposal drawn up and are still waiting on the comment period to end before moving forward with the plan. Have been working on increasing pollinator habitat and best management practices for pollinator habitat	Met with multiple stakeholders; have not had meetings between beekeepers and growers;	Legislative report due which will explore feasibility of registry program				
MS	Mississippi Department of Agriculture and Commerce	Michael Ledlow (662) 325-7773	Michael.L1@mdac.ms.gov	Complete Additional Comments: Plan has been in place for two years. We are currently evaluating.	A stakeholder meeting is scheduled for July, 2016 to determine if updates are needed.	No formal requirement in MS Apiary law. There is a voluntary hive registry.			http://www.mdac.ms.gov/wp-content/uploads/bpi_bee_brochure.pdf	Developed survey to stakeholders and currently compiling results.
MO	Missouri Department of Agriculture	Judy Grundler (573) 751-2462	judy.grundler@mda.mo.gov	Additional Comments: No official draft yet.	A pollinator protection meeting put together by the MO Dept. of Conservation was held in July, but there have been no meetings since, nor are there any scheduled for the near future.	Adopting voluntary apiary registration through DriftWatch				
MT	Montana Department of Agriculture	Elizabeth (Beth) Eiring Cam Lay (406) 444-3790	EEiring@mt.gov v CLAY2@MT.GOV	In final review Additional Comments: Final plan will be ready by the first of 2017.	Public hearings for rule changes Plan will be circulated to stakeholders (applicator groups, beekeepers, tribes) for comment. Meetings will be held if necessary.	Site registration is mandatory except for hobbyists	None. Montana no longer participates in Driftwatch due to budgetary constraints.	Applicators. Beekeepers.	Voluntary.	Initial evaluation will be focused on simple knowledge of pollinator protection issues. Subsequent metrics will focus on behavioral change.
				In draft form	UNL has been identifying			Beekeepers,

NV	Nevada Department of Agriculture	Chuck Moses (775) 353-3716	cmoses@agri.nv.gov	In final review Additional Comments: Final draft of the Nevada MP3 is finished and will be going to the Nevada Board of Agriculture for approval during their Tuesday, December 1, 2015, meeting.	Agency has met with some stakeholders, waiting on plan requirements from USEPA;	registry regulations in place, have to notify commercial aerial applicators if hives are in area; commercial applicators have to notify hive keepers; enforced in response to complaints				
NH	New Hampshire Department of Agriculture, Markets & Food	David Rosseau (603) 271-3640	david.rousseau@agr.nh.gov	In progress Additional Comments: Pollinator protection plan in development; part-time help hired in April 2016 to develop plan	New Hampshire State Wide Summit with stakeholders scheduled for November 2, 2015	Div. of Pesticide Control special; voluntary, Div. of Plant Industry	no			
NJ	New Jersey Department of Environmental Protection	Michael McConville (609) 984-6513	mike.mcconville@dep.nj.gov	Additional Comments:		Currently has a rule in place requiring notification of voluntary registered bee yards. The link to the rule can be found at this address under section 9.11: http://www.nj.gov/dep/enforcement/pcp/regulations/Subchapter%209.pdf				
NM	New Mexico Department of Agriculture	Irene King Bonnie Rabe (575) 646-2733	icalderon@nmda.nmdu.edu brabe@nmda.nmsu.edu	Additional Comments: Reviewing SFIREG guidance on pollinator management plans. Plans to begin draft in the fall.	No future meetings are scheduled with stakeholder groups at the moment.	Adopting voluntary apiary registration through DriftWatch;				
NY	NYS Dept. of Environmental Conservation	Eileen Murphy Anthony Lamanno (518) 402-2797	eileen.murphy@dec.ny.gov aclamann@gw.dec.state.ny.us	Additional Comments: Taskforce made up of state agencies is in place and has met 3 times. The taskforce is done meeting and is currently working on the report now. We would like to have recommendations done by January so that we can include programs that need state funding in the state budget. Waiting on plan requirements from USEPA						

State	Lead Agency	Contact Person & Information	Email	Plan Status	Stakeholder Engagement Process	Apiary Registry	Mapping Service	Target Groups for BMPs	Types of BMPs	Evaluation Measures
NC	North Carolina Dept. of Agriculture and Consumer Services (NCDA&CS)	Patrick Jones or John Allran (919) 733-3556	Patrick.Jones@ncagr.gov John.Allran@ncagr.gov	In progress Pollinator Protection Strategy is in progress.	A broad stakeholder group across multiple NCDA&CS Divisions, NC State University Departments, and NC Farm Bureau has developed documents to help facilitate communication between pesticide users and beekeepers. Other best management practices are being collected for the NC Pollinator Protection Strategy. NCDA&CS has met with the NCSBA for several years and has met with many County beekeeping Chapters.	Apiary Registration - Voluntary registration - \$10.00 fee. - mandatory notification if aerial application of a pesticide labeled as toxic to bees is applied within 1 mile of a registered apiary. Written, oral notification, phone or electronic communication allowed for notification. Farmers and aerial applicators in area of registered apiary are notified quarterly. Notification must be made with no	DriftWatch/BeeCheck was initiated on 4/4/2016. FieldWatch url is http://www.fieldwatch.com/	Growers, Landscapers, Beekeepers, and Homeowners	Crop Specific considerations from County Extension and Crop Specialists, label interpretations, communication guidelines, and rating of pesticide risk to bees.	# of registered apiaries and applicators in DriftWatch.
ND	North Dakota Department of Agriculture	Samantha Brunner Carrie Larson Kari Doan (701) 328-4765	sbrunner@nd.gov cllarson@nd.gov kdoan@nd.gov	Additional Comments: Published since January of 2014. Since its publication, edits have been made and sent to the commissioner. We are still waiting for his approval.	Yes - Initial stakeholder meeting in 2013; and a follow-up July 30, 2015 to gather feedback on how the plan has been working in North Dakota.	Online map for applicators' https://apps.nd.gov/ndda/mapping/ Shows sensitive areas including apiaries				
OH	Ohio Department of Agriculture	Matt Beal (614) 728-6383	beal@agri.ohio.gov	Additional Comments: Honey bee task force in place for five years; pollinator protection plans not yet developed; have rules regarding application to blooming crops	Will develop a working committee to respond to need for plan.	Mandatory Registration, Voluntary Notification Program				
OK	Oklahoma Department of Agriculture, Food, and Forestry	Kenny Naylor Don Molnar (405) 522-5974	kenny.naylor@ag.ok.gov don.molnar@ag.ok.gov	Complete Additional Comments: Plan is complete and approved.	5 statewide meetings in 2015 There will be no more stakeholder meetings open to the public, but a stakeholder committee did meet to go over the plan.	Voluntary Registration, Have Developed Pesticide Sensitive Location Viewer to map location for applicators to locate location of hives and other sensitive crops.	We are moving from our pesticide sensitive viewer to the Kelly Registration Systems viewer	Beekeepers Landowner/Leaseholder Pesticide User	See Plan link	The committee is currently working on this to determine what if any would be good performance measures
OR	Oregon Department of Agriculture	Rose Kachadoorian (503) 986-4635	rkachadoorian@oda.state.or.us	Additional Comments: Partnering with Oregon State University. Pollinator taskforce had disbanded, however, a secondary stakeholder group, to begin working on developing a plan.	Public stakeholder meetings held in 2015.	Any person who owns five or more colonies of bees located in Oregon is required to register with ODA. However, compliance is thought to be very low. No mapping service.				
				In progress					ROW
