Member states from across the country and all EPA regions have reached out to AAPCO to request that the organization contact EPA and request an extension to the timeline for submitting comments on the 2022-2025 Cooperative Assistance Grant (CAG).

With increased job demands due to COVID-19, working from home and furloughs, states are concerned that the compressed timeline of August 5th, will not allow for robust review and conversation.

Whereas this CAG will greatly impact states for several years, we are asking that EPA extend the timeline for comments until August 21.

Please respond at your earliest opportunity.

Thank you,

Leo A. Reed
President, AAPCO
